 3. Selecting Goto Status button sends to Project Feature Status for selected project.
 4. Selecting either of the Needs Approval or Updates text box will send to Comments Page.
 5. Selecting New User button will send to signup a new user.
 6. To add a new project, the New Project button is selected and sends to New Project Page.
 7. Goto Email Button is listed on a few pages but spoken of here.
- General Page Info:
8. Either Add Approval or Add Update button will send to Add Approval/Update page and will show text accordingly.
 - A. Entering Text into text boxes to allow for access to Student's page.
 - B. Current Projects Page will allow access to either adding new projects or working on current.
 - C. In the large text box will be comments posted by user about project, this should save automatically. The Progress of Project bar will show how far it is complete. There is a button that will save the entire project and send to old projects.
 - D. Text/Buttons will pop up as they are updated or need approval.
 - E. Comments can be added to each approval and update from selecting the prior page.
 - F. Adding info to gain access to page. This information will be stored in a db.
 - G. Adding a new project requires information entered into each text box. Collaborators should look in db for users. Selecting the button Complete returns user to prior page and shows a project button with the Project Name.
 - H. Email page will show incoming from users inside app. It is also where the compose email function is done.
 - I. This will either add a new approval or update depending on the button selected on prior page.
